----------	---

<b>4</b>	<b>Practice Restrictions and Exclusions</b> <p>The A&amp;TSI Health Worker/Health Practitioner and their supervisor should <b>discuss and determine any particular activities which are outside the scope of the job role and which should not be performed</b>, including due to legislation, workplace policy and/or a lack of appropriate supervision. These may include activities that the A&amp;TSI Health Worker/Health Practitioner has performed in previous roles</p> <p>The following restrictions apply:</p> <ul style="list-style-type: none"><li>• <b>Not to perform any clinical assessments</b> other than population screening activities</li><li>• <b>Not to provide any advice or information about medications</b>, other than nicotine replacement therapies</li><li>• <b>Not to provide any clinical treatments</b> (eg wound management), other than first aid.</li></ul>
----------	--

## Example: Individual Scope of Practice – Health Promotion Worker

### 5 Current scope of practice

The A&TSI Health Worker/Health Practitioner and their supervisor should discuss and determine the individual's current scope of practice in the role, based on the activities highlighted in Step 3. Use the space below to define the A&TSI Health Worker's/Health Practitioner's current scope of practice. This is not intended to be a complete list of activities or responsibilities, but should be indicative of the types of activities that the A&TSI Health Worker/Health Practitioner may perform in the role. Mark with an asterisk (\*) the activities that require supervision.

Plan and implement health promotion projects

Undertake population screening activities involving health assessments, including blood pressure, waist circumference, and blood glucose checks for diabetes risk.

Work with partners and external agencies to develop and implement local and regional Aboriginal Health Strategies

Write reports to meet organisations, funding and community requirements

Contribute to the review of health promotion business and strategic plans

Mentoring trainees for activities within his own scope

### 6 Required activities currently outside scope

From the list of activities that the individual is expected to do (Step 3) copy below the activities the A&TSI Health Worker/Health Practitioner does not yet have the training, experience and/or skills to undertake. These are the activities that are not highlighted.

Participate in needs assessments of population and target groups in relation to identified health problems and available strategies.

Prepare and deliver presentations as required.

Lead the development, implementation, evaluation and dissemination of health promotion strategies and programs, including population screening programs (eg heart disease and diabetes risk, sexual health).

## Example: Individual Scope of Practice – Health Promotion Worker

### 7 Supervision requirements and referral pathways

*In consideration of the work setting and skill mix of the team (Step 2), any restrictions to supervision identified (Step 4) and the A&TSI Health Worker's/Health Practitioner's current scope of practice (Step 5):*

- » determine their supervision requirements, including whether this should be direct, indirect or remote supervision; who can provide supervision, under what circumstances and how it will be structured – noting that these requirements may vary across different types of activities
- » list any activities in Step 4 for which the service is unable to provide appropriate supervision
- » **determine the process for referring and escalating patient/client care**, and the conditions under which these processes would apply.

Direct supervision for

- Urine specimen collection
- Preparing and delivering presentations
- Population health needs assessments

Until deemed competent by Senior Health Worker

Indirect supervision for all other activities.

**Clients who are unwell, or seeking specific health advice, will be referred** to the Senior Health Worker.

Refer all clients **immediately** with:

- Chest pain or new shortness of breath
- Systolic BP <100 or >180
- Diastolic BP >110

### 8 Continuing Professional Development (CPD)

Develop a plan for professional development for the next 6–12 months. The plan should:

- » help the A&TSI Health Worker/Health Practitioner maintain their current scope of practice
- » identify any educational and/or experience/skills requirements the individual needs to meet in order to work at full scope of practice (if limitations apply)
- » address the A&TSI Health Worker's/Health Practitioner's career aspirations
- » ensure that requirements for registration are met (if applicable).

If the organisation uses a CPD template, complete it and attach to this document instead.

First Aid Certificate annually

In-service training in urine specimen collection with Senior Health Worker or Registered Nurse

Complete two-day "Presentation skills" course at Greentown Training College. Andrew to practice his presentation skills at the Health Service team meetings
